In some countries, including the United States, a company can administer "drug tests" to employees, even if they do not operate machinery (such as pilots, truck drivers or crane operators). Do you think Canadian companies should be able to administer "drug tests" to any employee if marijuana becomes legal?

Two American states that have legalized marijuana—Washington and Colorado—currently allow law enforcement officers to arrest drivers suspected of being impaired by marijuana. Both states have also established a legal blood-cannabis limit for drivers. Thinking about this, should Canada allow law enforcement officers to arrest drivers suspected of being impaired by marijuana and administer a blood test?
